

CLAIMS

I Claim:

1. A flush valve comprising a flush valve outlet fixture and flexible tubing.
2. A floatable device having two holes with a diameter nearly the same as the diameter of the flexible tubing of claim 1 that extend through the floatable device.
3. The flush valve of claim 1 wherein the flexible tubing is connected at one end to the flush valve outlet fixture.
4. The flush valve of claim 1 wherein the flexible tubing is threaded through one hole of the floatable device of claim 2 and threaded back through the second hole of the floatable device of claim 2
5. A flush handle having an extension rod that extends away from the flush handle and then bends at nearly a right angle again extending away from the flush handle and yet another bend angling away from the flush handle.
